

Slide - 1

Use the video from the tutorial that shows an example of video blur, trimming the beginning to start from the 6th second.

Slide - 2

Use a funny photo (for example, *1.webp*).

- Blur several faces with a classic circular blur.
 - Blur other faces with a mosaic (pixel) blur.
Add a yellow outline around the blurred areas:
 - Circular outline for the standard blur.
 - Square outline for the mosaic blur.
- Visual reference - *example 2.jpg*.

Slide - 3

Show a child whose face is partially blurred using the **Touch Blur** feature (freeform blur).
The screenshot should clearly show that the user applied the blur with their finger.
Visual reference - *example 3.jpg*.

Slide - 4

A photo of an attractive woman with a blurred background and the caption: "Blur the background - highlight what matters."
Visual reference - *example 4.jpg*.

Other slides

Keep the existing slides after the first four unchanged.
They can complement and showcase the app's additional features.
