

The face of Mona Lisa (see *1.jpg*), divided by a thin white diagonal line, with a second dividing line extending from the center of the first one toward the bottom right corner. In the center of the icon is a “Play” symbol (the video playback icon).

The left part of the image remains unchanged, while the right part is divided into two zones:

- the upper area has a blur effect;
- the lower area has a mosaic blur (pixelation).

A similar implementation can be seen in examples *3.jpg* and *4.jpg*.
